

EasiFoamer™ Applicator & Extension Kit

AAF/004 & AAF/014

Properties

Shield, Lance and Hook: Polypropylene

Gun Body & Lever and Connectors: Polypropylene

Mesh: Stainless Steel

Retractable Coil: Nylon blend

'o' rings: Silicone and Viton

Cable Ties: Nylon

Dimensions: Applicator = 18 x 50 cm bag

Extension Kit = 18 x 17 x 33 cm

Net weight: Applicator = 142 g

Extension Kit = 759 g

Background

Pre- and post-milking dairy hygiene is recommended for the pro-active control of Mastitis-associated pathogens. Whilst post-milking treatments have been effective at reducing the level of contagious mastitis, pre-milking treatment of cows' teats has been found to reduce the risk of contamination and new infections, particularly those caused by environmental pathogens. Foam is particularly effective at loosening and lifting dirt and faecal matter from the teat as it is better at penetrating to the skin surface than liquid. The use of foaming chemicals also reduces chemical consumption when compared to using liquid dips or sprays.

Product Technical Data Sheet

EasiFoamer™ applicators use special patented foaming mesh inserts to generate optimum foam structure ensuring that the appropriate amount of chemical is applied to the teat each time. They also facilitate the correct bubble structure that is essential for agitation of the teat surface in order to lift dirt and debris.

Features

- Especially designed for fast foam application.
- Minimises labour compared to manual filling of foaming dip cups.
- Easy to dismantle for rapid cleaning. Handy bracket enables applicator to be hung up, reducing wear and tear on the applicator and coil.
- Extension kits enable expansion of the number of drop coils on the EasiFoamer™ system.
- Patented system of foaming meshes to generate foam of an optimum quality (Patent EP2124524).
- Applies just the right amount of chemical to the teat requiring a single towel wipe to remove foaming chemicals.
- The following parts (in addition to those shown above) can be ordered separately as product codes:
 - AAF/004 – AutoFoamer™ Lance Assembly.
 - AAF/006 – AutoFoamer™ Coil with Manifold.
 - AAF/007 – AutoFoamer™ Filter Disk Pack.
 - AAF/008 – AutoFoamer™ 'O'-Ring Pack (3 large & 3 small).
 - AAF/015 – AutoFoamer™ Trigger Valve Kit.
 - AAF/016 – AutoFoamer™ Manifold Repair Kit.
 - AAF/017 – AutoFoamer™ Applicator Hanging Hook.
 - AAF/018 – AutoFoamer™ Dropper Support Bracket.
 - AAF/019 – AutoFoamer™ T Piece (Twin Pack).
 - ATS/405 – Trigger Valve Service Kit.
 - ATS/406 – Retractable Coil.
 - ATS/407 – T Connector with Nuts.
 - ATS/408 – Straight Connectors with Nuts (pack of 2).
 - ATS/409 – Connector Nuts (pack of 6).
 - ATS/410 – 6m Flexible Delivery line tubing (included in complete extension kits).
 - ATS/411 – Cable Ties (Pack of 10).
 - ATS/438 – Repair Kit for Ambic Drop Coil.
 - ATS/461 – Straight Connector.
 - AJS/2055 – AmbiSpanner™.
