

Ambic StripCup

ASC/700

Properties

StripCup Body: Polypropylene

Anti-Splash Screen: Polypropylene

Capacity: 500 ml

Dimensions: 16 x 19.5 x 12 cm

Net weight: 0.19 Kg

Background

Foremilking is recommended as the first step in identifying the presence of mastitis in cows. It also stimulates oxytocin release and assists the milk let-down reflex as well as helping to remove bacteria from the teat canal.

Although foremilking is recommended by veterinarians around the world, in many countries it is a mandatory requirement.

Features

- Provides high visibility of clots or other abnormalities in milk.
- Minimises the risk of cross-contamination.
- Unique anti-splash feature built into the StripCup screen reduces the risk of spreading pathogens that is associated with “flat plate” strip cups.
