

AutoFoamer™ Remote Pressure Switch Voltage Reduction Board

AAF/036

Properties

PCB: Fibreglass

Electronic Components

Fitted with a Transformer relay

PCB solder

Dimensions: 15 x 9.5 x 3 cm

Net weight: 156 g

The purpose of this board is to reduce the voltage on the pressure switch from 240V to a lower voltage for safety reasons. It is suitable for use with the Ambic AutoFoamer remote pressure switch but is **not** compatible with the Ambic EasiFoamer™ system.

Country of Origin: GB

HS commodity code: 8439000
