

Ambic Cassette DipMizer™

ADM/201

Properties

Body Adaptor: Thermoplastic Elastomer

Cassette Body and Closure: Polypropylene

Brush: Black Polypropylene & Stainless steel

Dimensions: 17.5 x 3.5 x 25 cm

Net Weight: 62 g

Features

- Improved second generation DipMizer™.
- Adds a 'sweeping' step to remove excess chemical from the teat.
- Cassette design enables easy removal of the brush for cleaning or replacement.
- Low density bristles are designed to remove just enough chemical, but not too much.
- Can be used with all non-foaming Ambic Dip Cups.
- Available in a range of colours for pre- and post- dipping applications.
- Available as single pack or pack of three (ADM/203).
- Spare brushes can be purchased separately.
